Lab 01

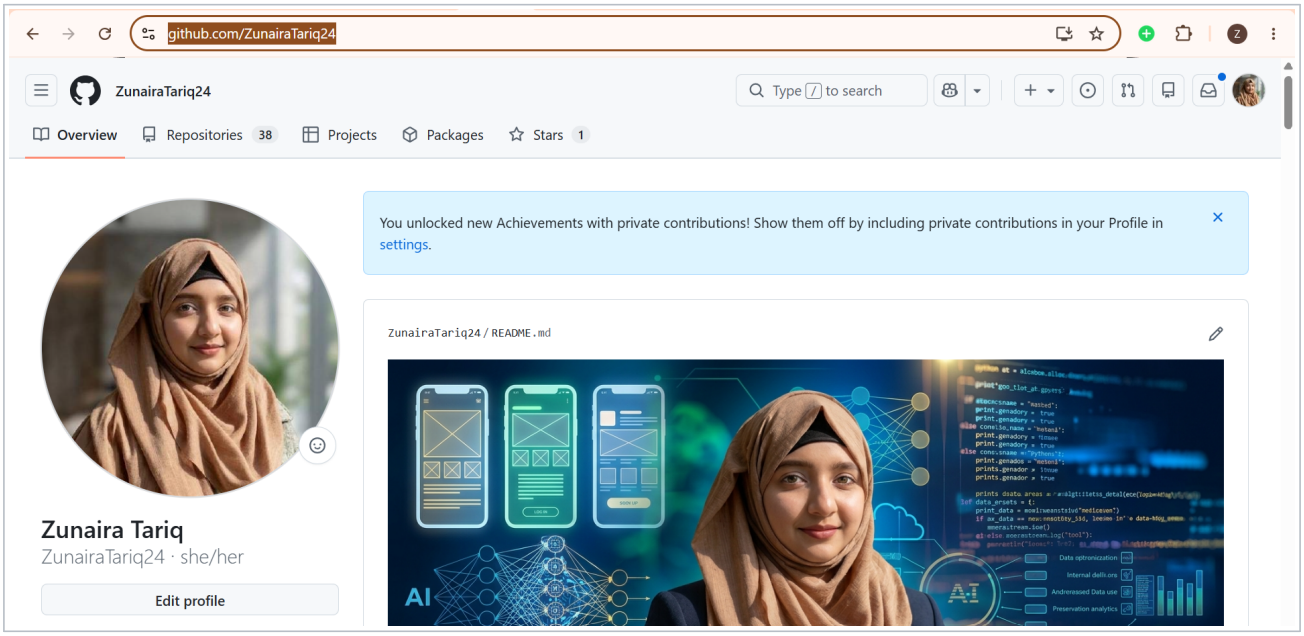

GitHub Identity, Student Portal Registration, and Ubuntu Server Installation

Name	Zunaira Tariq
Registration Number	2023-BSCS-95
Course Code	Cloud DevOps (CS-649)
Section	A
GitHub Username	zunairatariq24

Task 1: Create and Configure Your GitHub Account

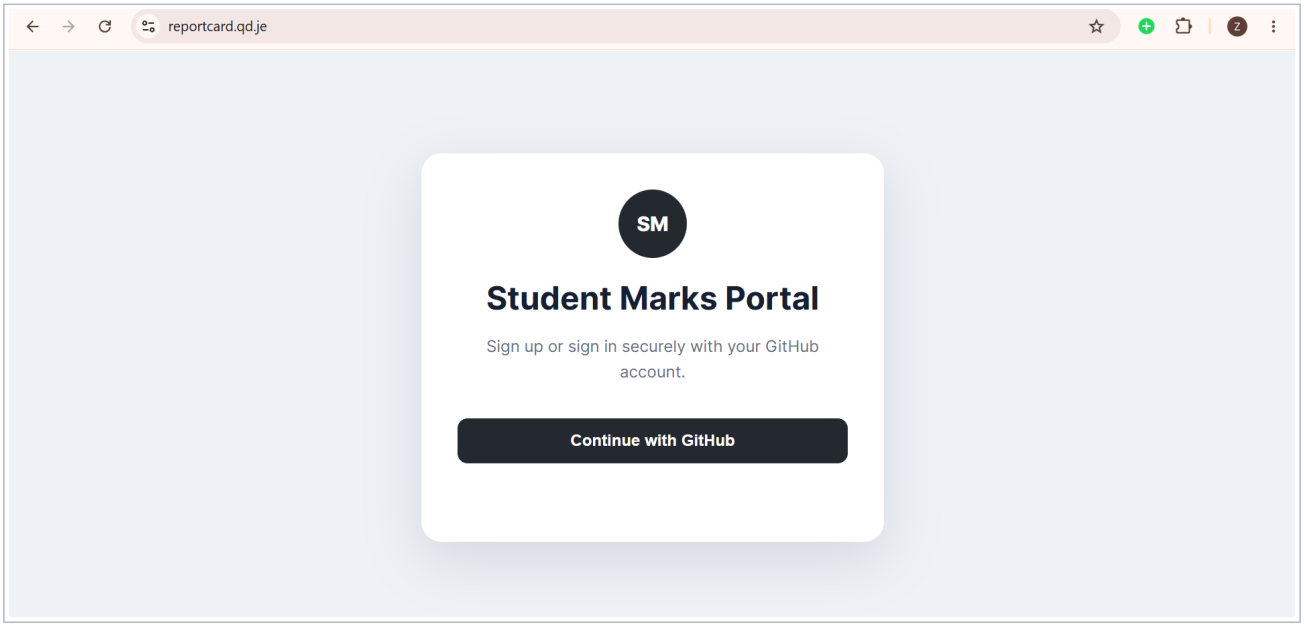

***github_profile.png**: GitHub profile page (github.com/ZunairaTariq24) showing the profile name Zunaira Tariq and the username ZunairaTariq24.*

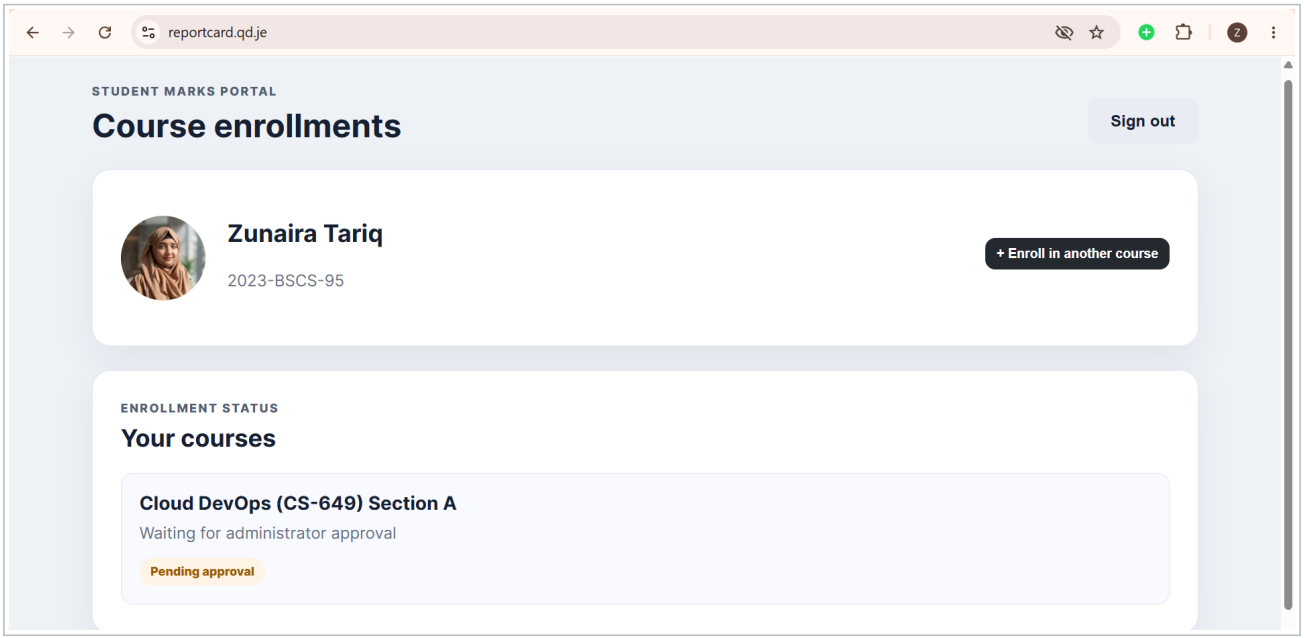

***github_actual_name.png**: GitHub profile showing the complete actual name, Zunaira Tariq, on the account.*

Task 2: Register in the Student Marks Portal

***portal_login_page.png**: Student Marks Portal login page with the Continue with GitHub option.*

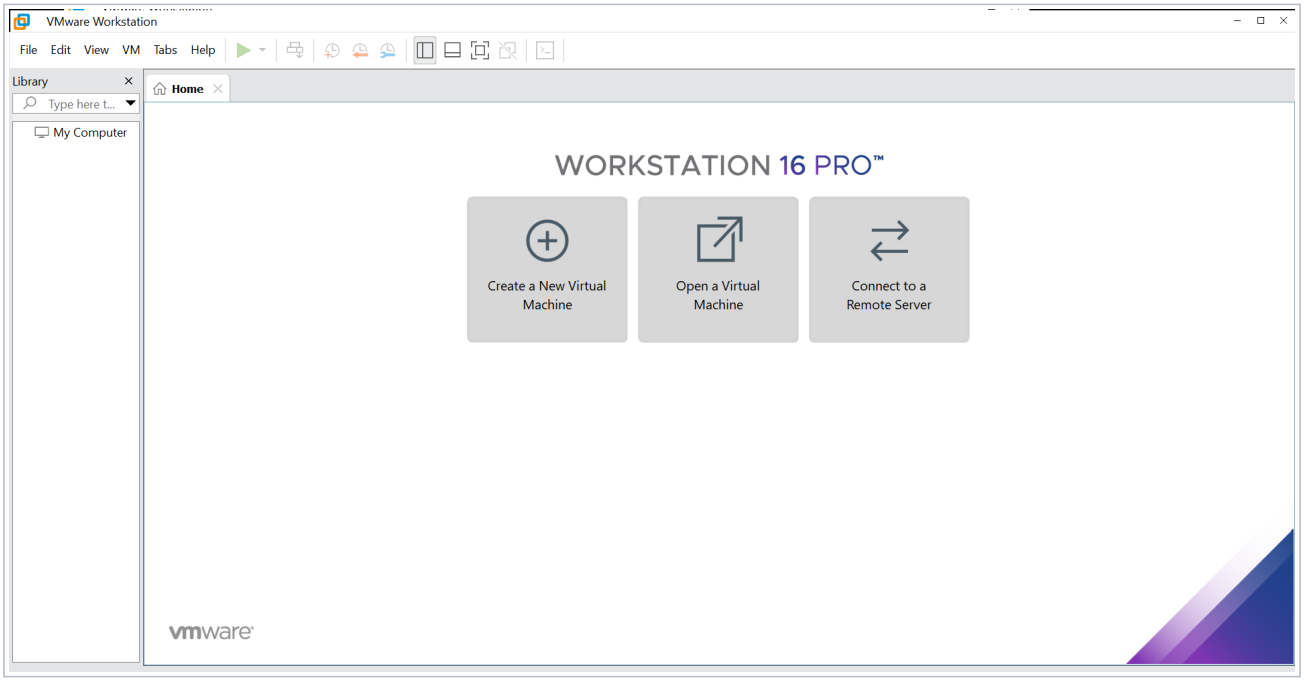

***portal_github_profile.png**: GitHub profile information shown inside the portal after signing in.*

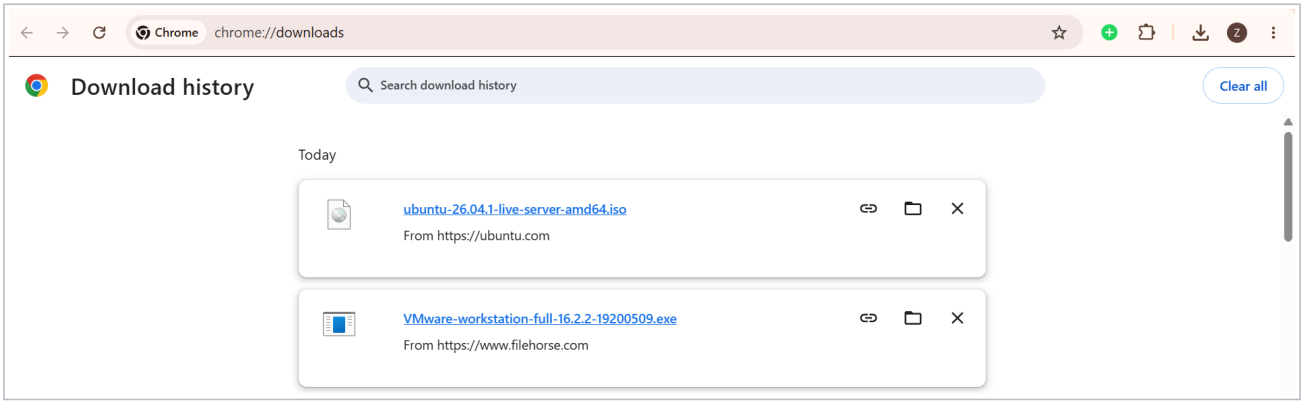

***portal_enrollment_submitted.png**: Enrollment for Cloud DevOps (CS-649) Section A submitted and pending administrator approval.*

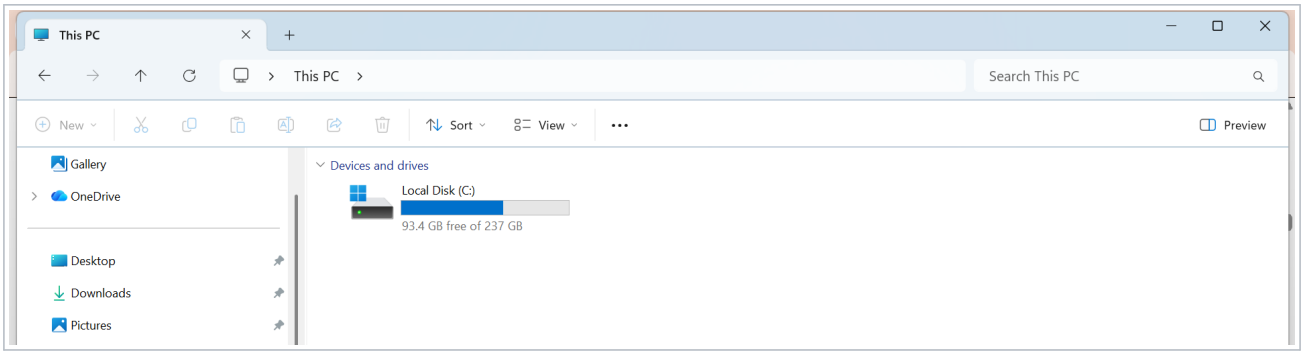

Task 3: Download VMware Workstation Pro and Ubuntu Server

***vmware_workstation.png**: VMware Workstation Pro installed and running on Windows.*

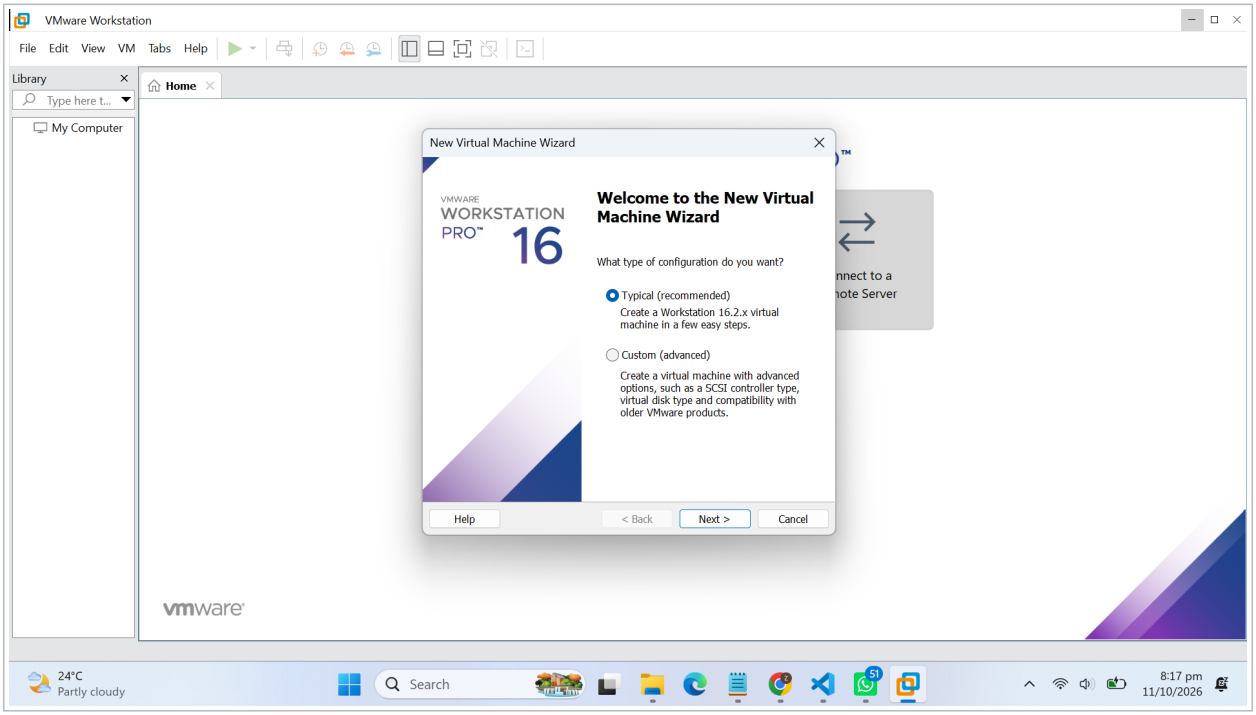

***ubuntu_server_iso.png**: Downloaded Ubuntu Server LTS ISO file and its filename.*

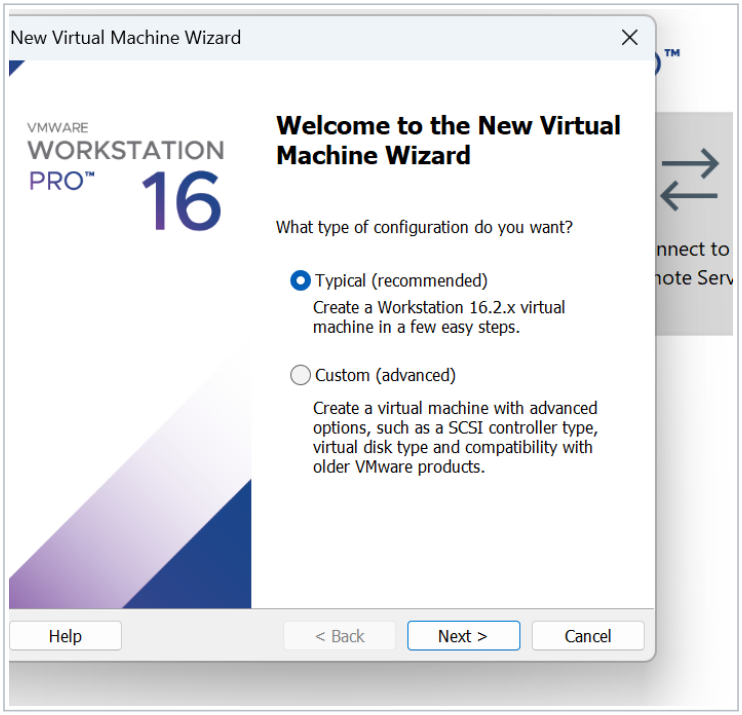

***available_storage.png**: Available disk space confirming at least 20 GB is free for the virtual machine.*

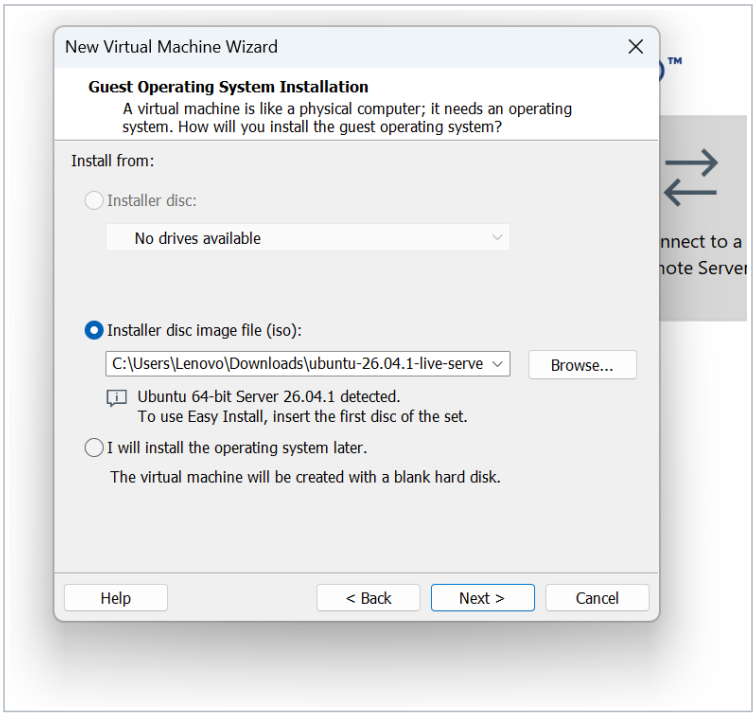

Task 4: Create the Ubuntu Server Virtual Machine

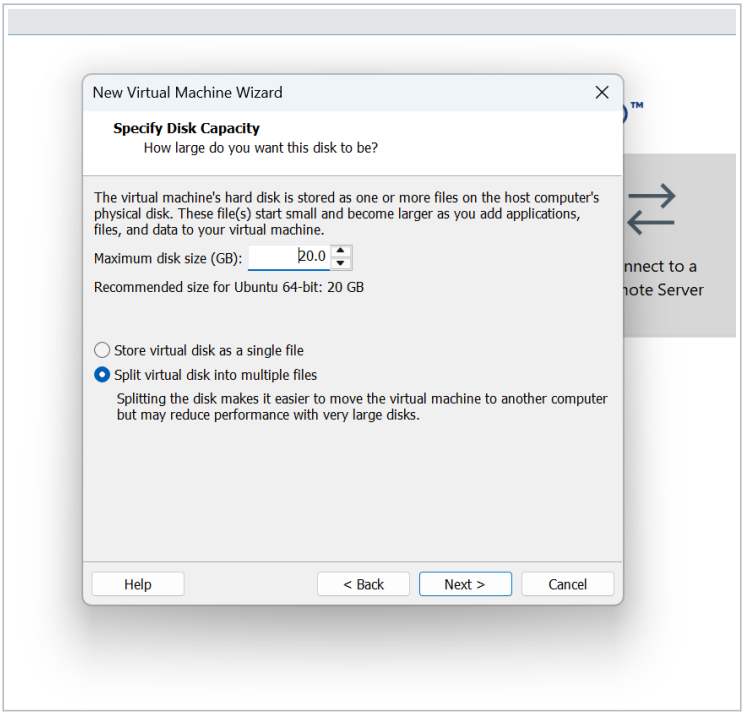

***vm_creation_wizard.png**: VMware New Virtual Machine Wizard opened.*

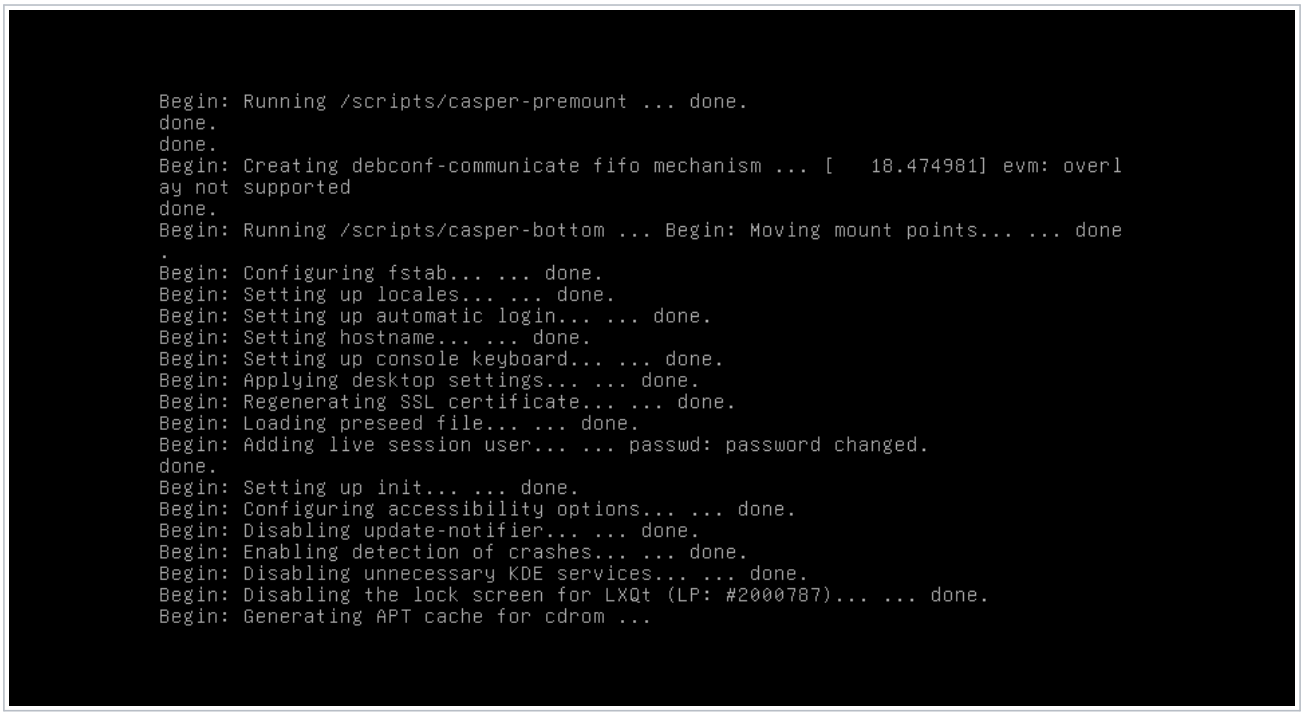

***vm_typical_configuration.png**: Typical (recommended) configuration selected.*

***vm_ubuntu_iso_selected.png**: Installer disc image file (ISO) selected with the Ubuntu Server ISO path.*

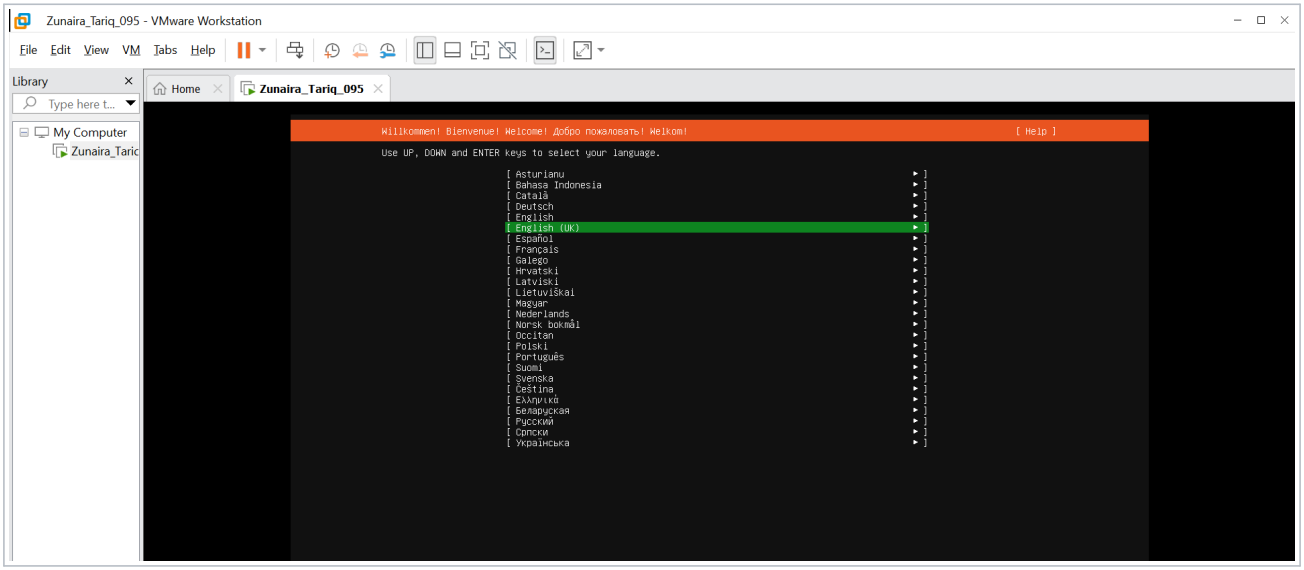

***vm_configuration_summary.png**: Final virtual machine configuration summary, including the virtual disk size.*

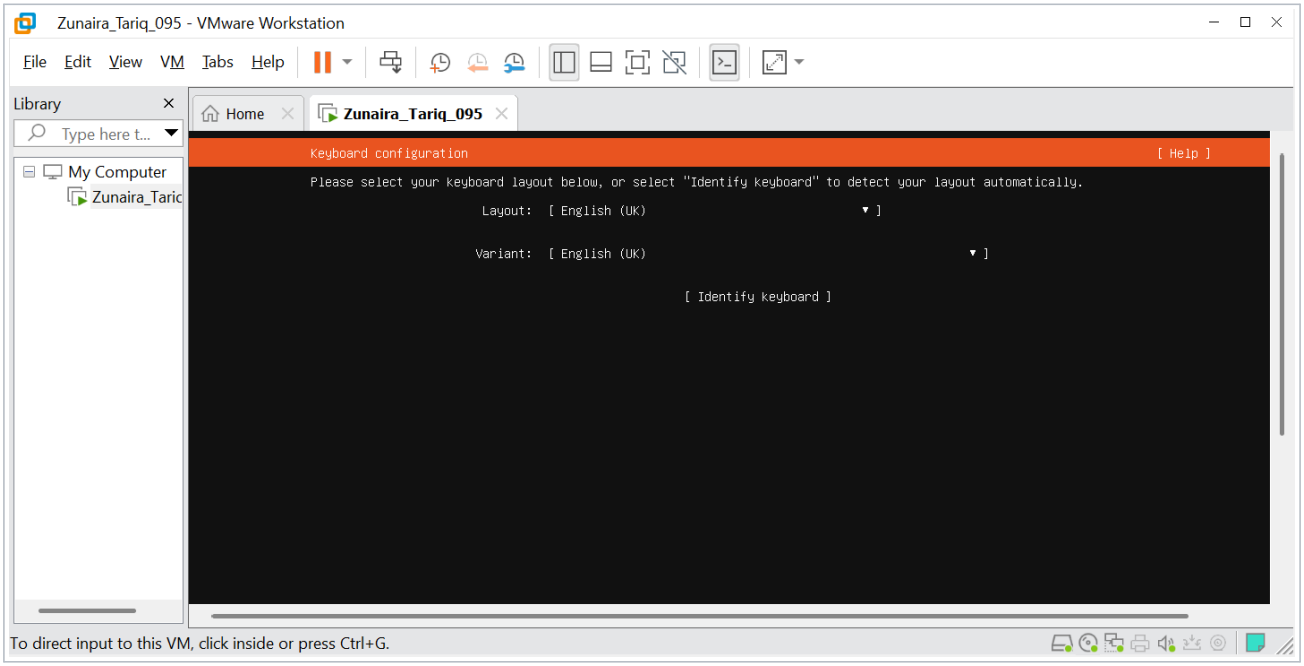

***ubuntu_installer_boot.png**: Ubuntu Server installer boot screen after powering on the virtual machine.*

Task 5: Choose the Installation Language

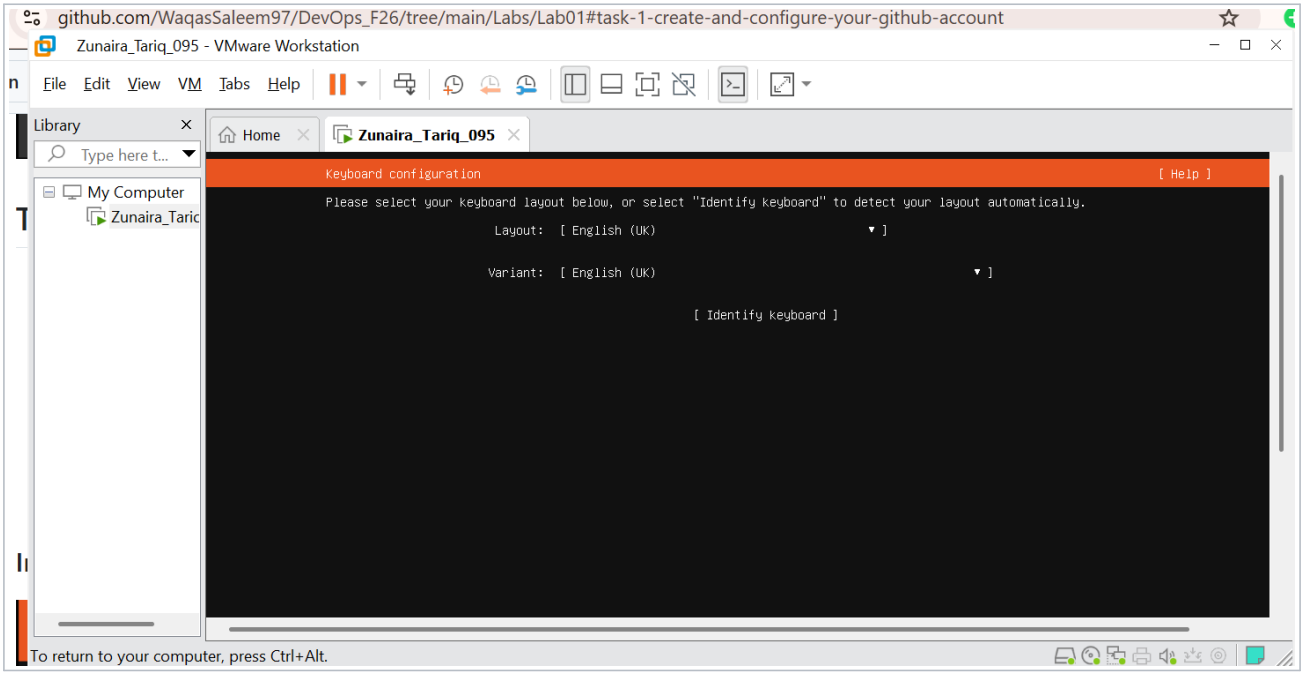

***ubuntu_language.png**: Installation language selected in the Ubuntu Server installer.*

Task 6: Configure the Keyboard Layout

***ubuntu_keyboard_layout.png**: Keyboard layout selected to match the keyboard.*

***ubuntu_keyboard_variant.png**: Keyboard variant selected.*

Task 7: Choose the Ubuntu Server Installation Type

Task 8: Configure the Network

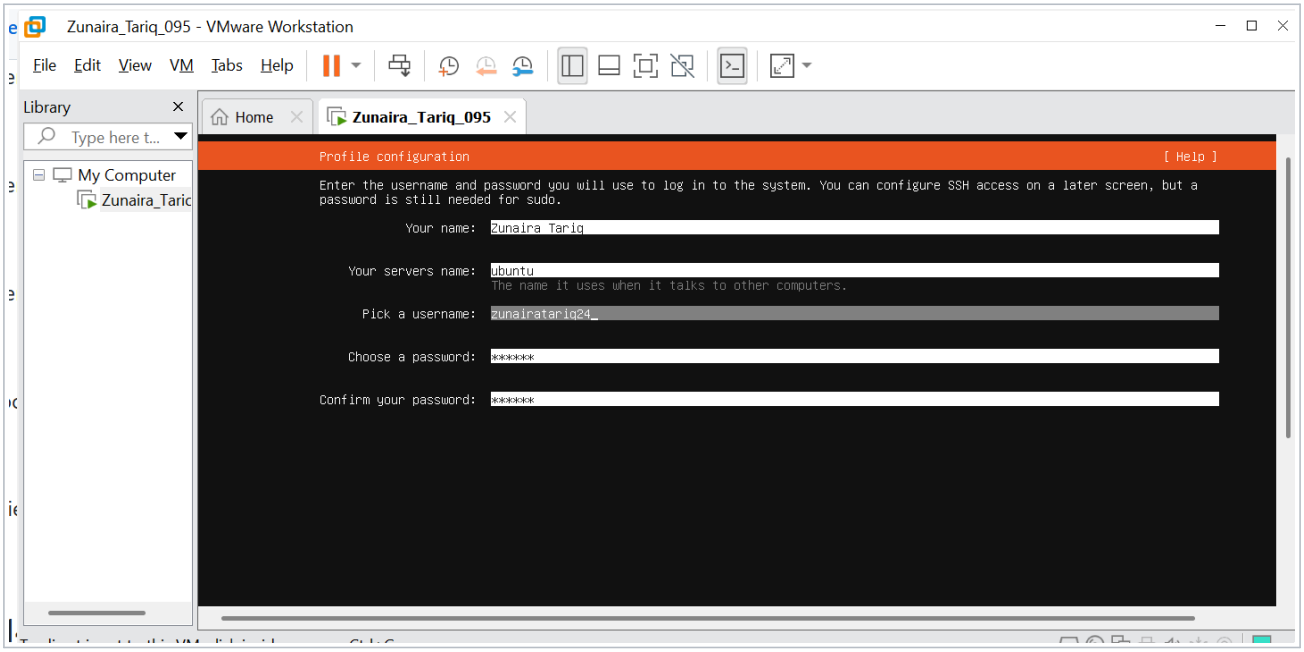

Task 9: Configure Storage

Task 10: Select the Installation Disk

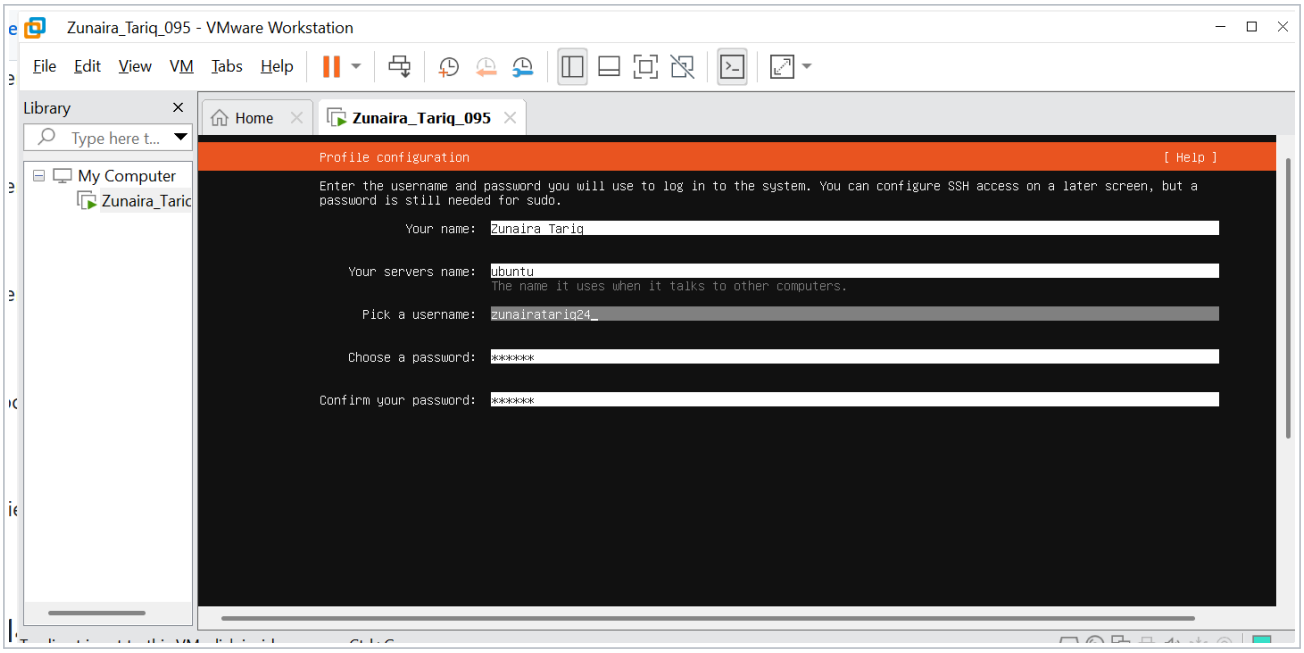

Task 11: Review the Partitions

Task 12: Confirm the Storage Changes

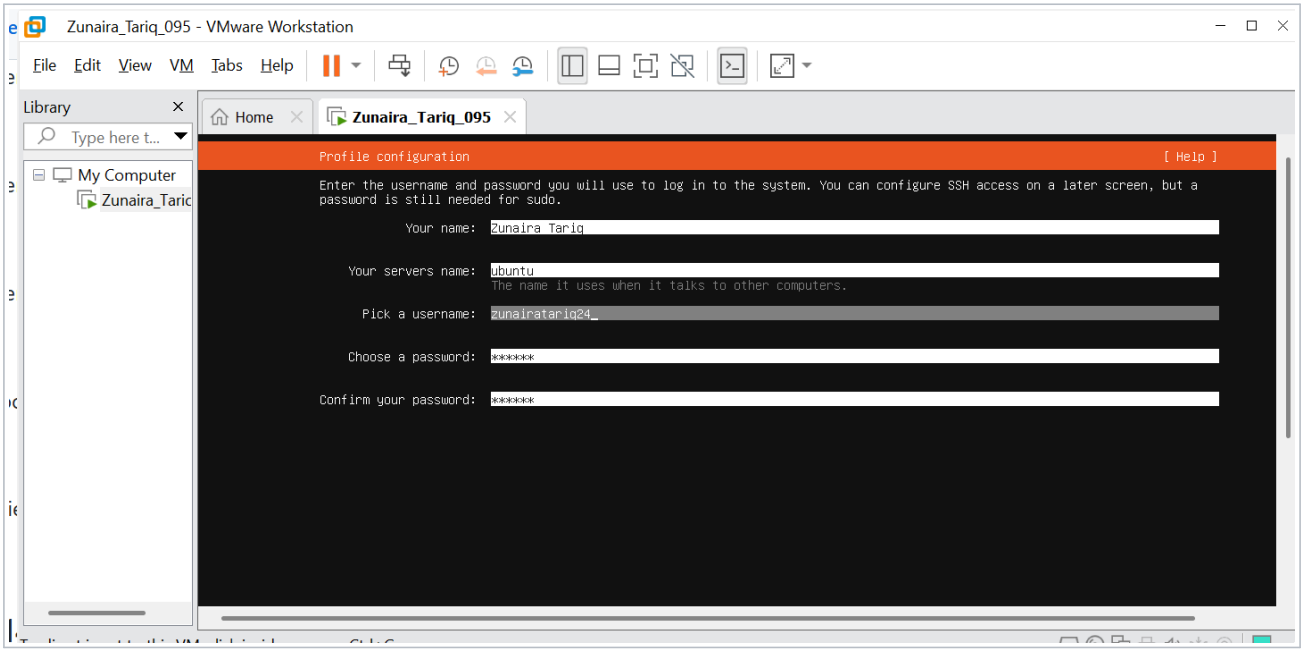

Task 13: Configure the Ubuntu Profile

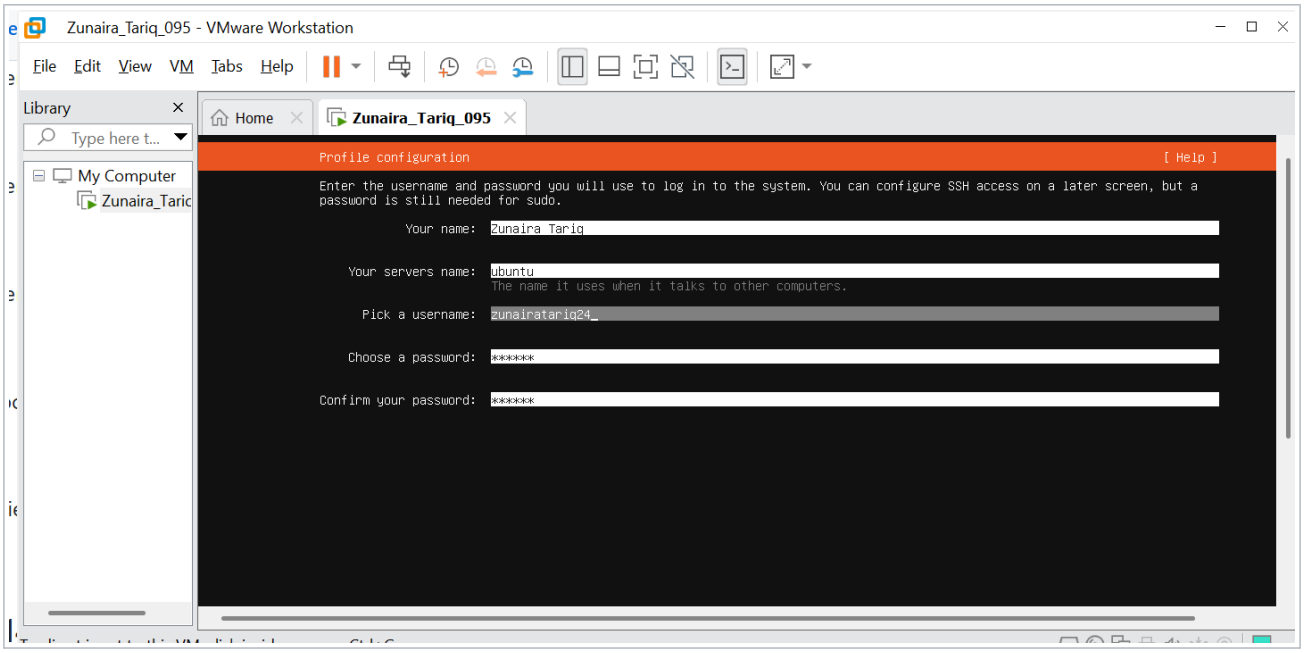

***ubuntu_actual_name.png**: Complete actual name (Zunaira Tariq) entered in the Your name field.*

***ubuntu_server_name.png**: Server name set to ubuntu.*

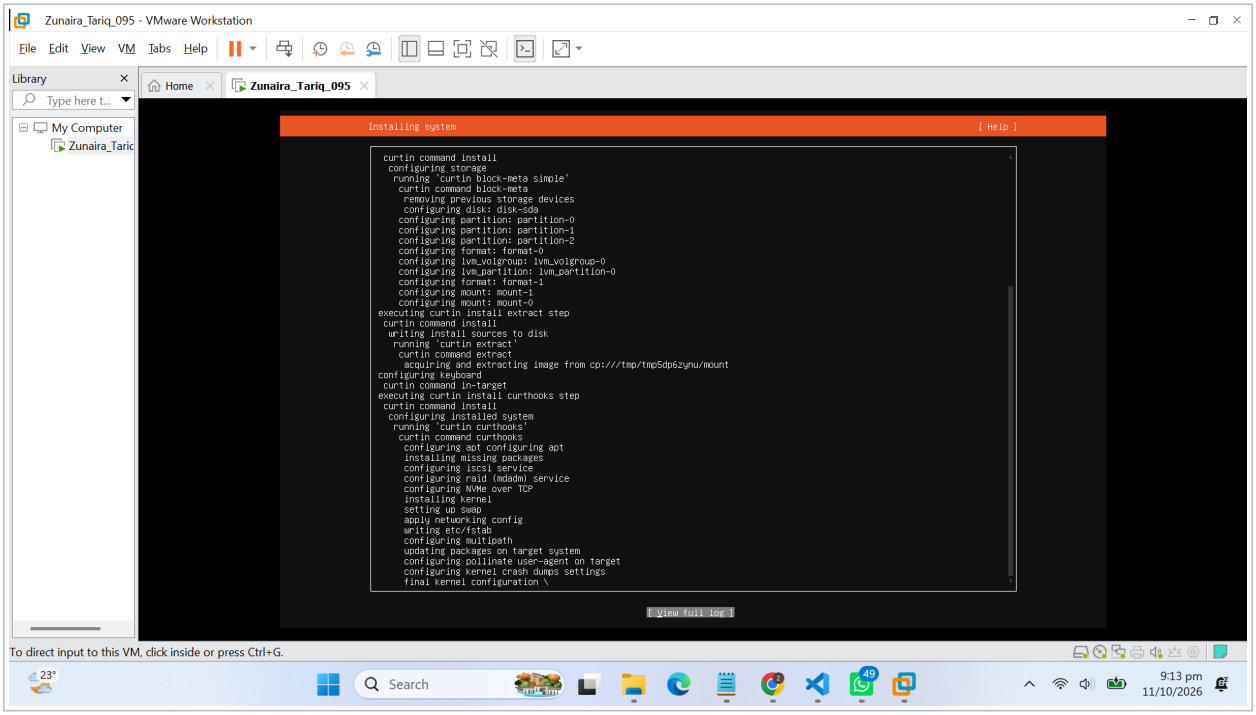

***ubuntu_username.png**: Ubuntu username set to zunairatariq24, matching the GitHub username.*

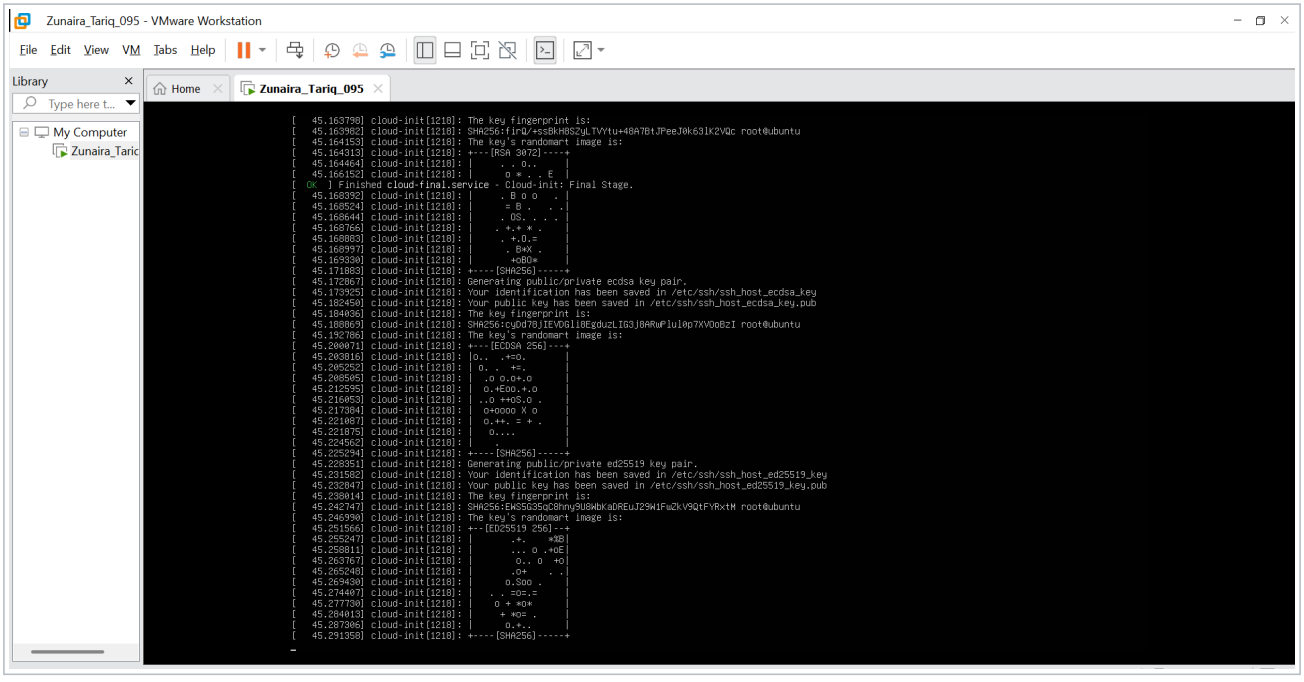

***ubuntu_profile_setup.png**: Completed profile page with all fields reviewed (password masked).*

Task 14: Complete the Software Installation

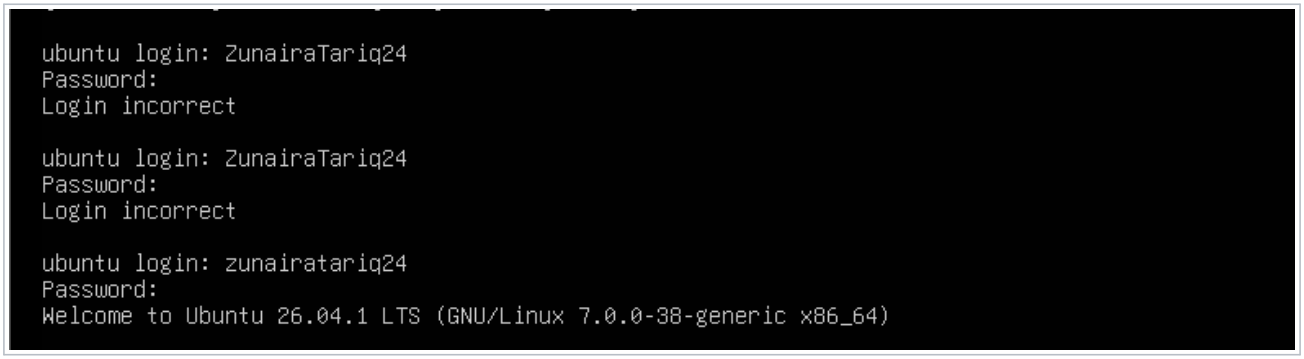

***ubuntu_installation_progress.png**: Ubuntu Server installation in progress.*

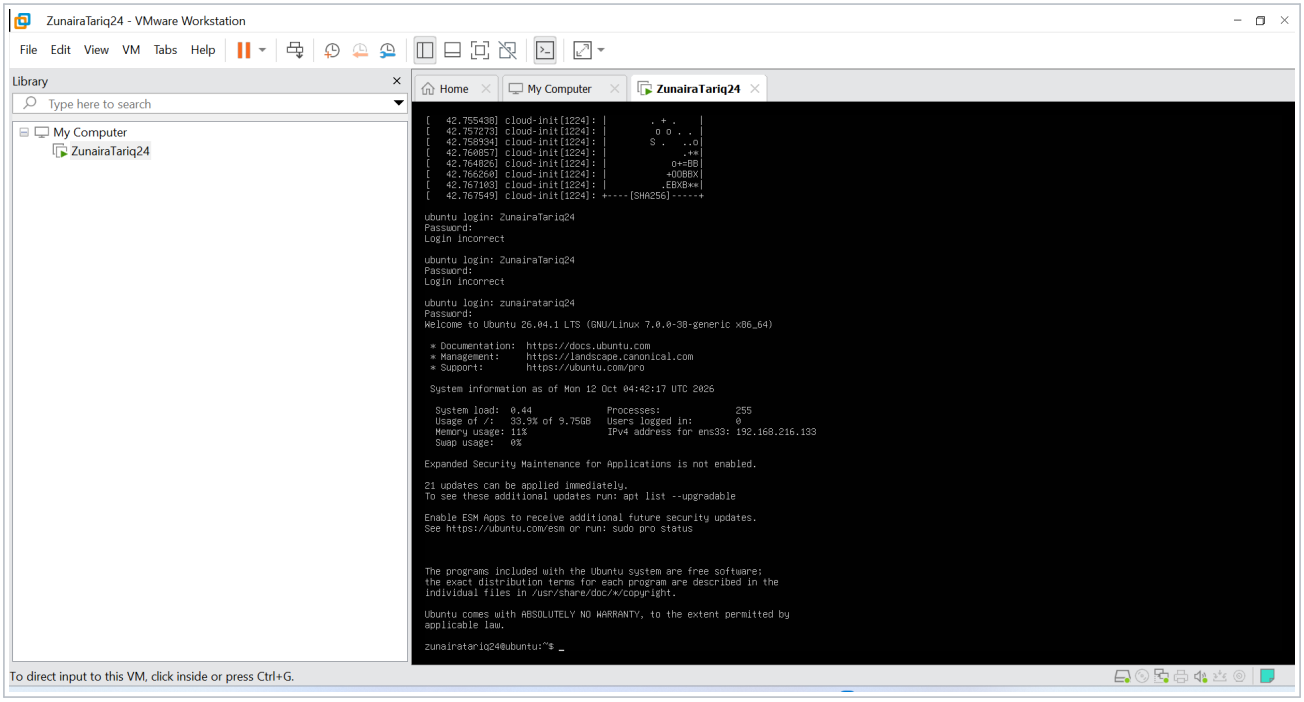

Task 15: Reboot and Verify the Ubuntu Identity

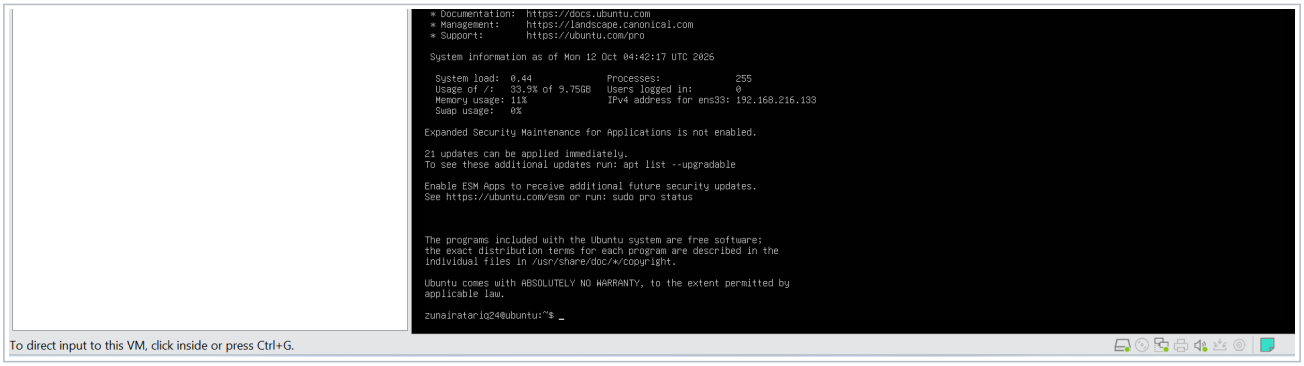

***ubuntu_installation_complete.png**: Installation complete screen with the Reboot Now option.*

***ubuntu_login_screen.png**: Ubuntu login screen after the first boot.*

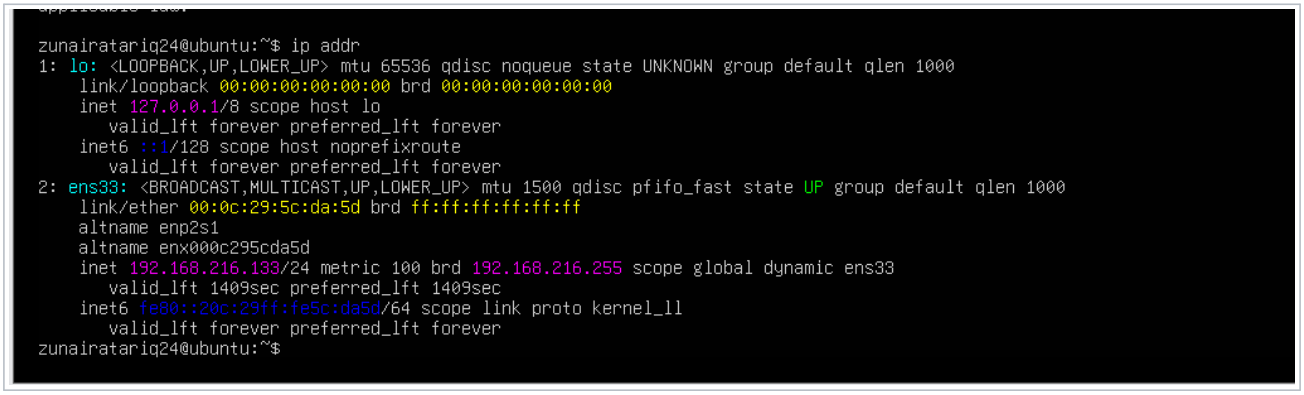

***ubuntu_terminal_login.png**: Successful terminal login with the configured username and password.*

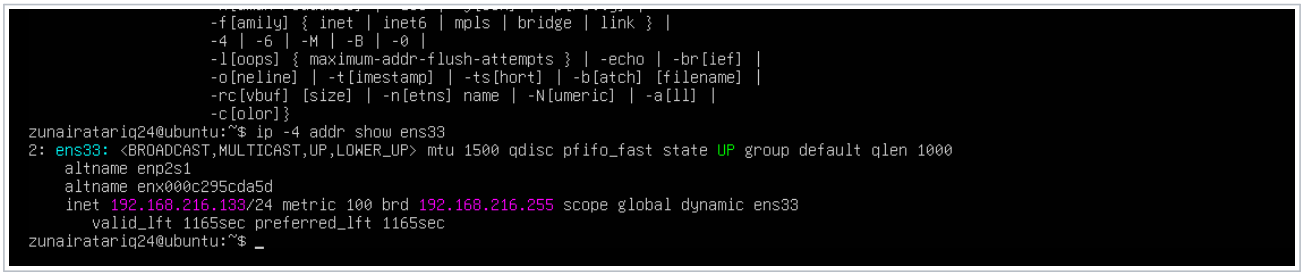

***ubuntu_identity_verified.png**: Terminal prompt zunairatariq24@ubuntu:~$ verifying the required identity.*

Task 16: Find the Ubuntu Server IP Address

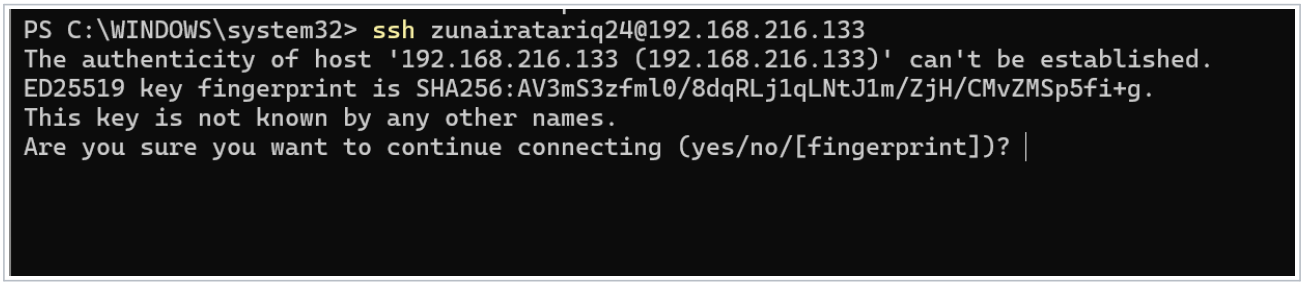

***ubuntu_ip_addr_command.png**: The ip addr command and its output run inside Ubuntu Server.*

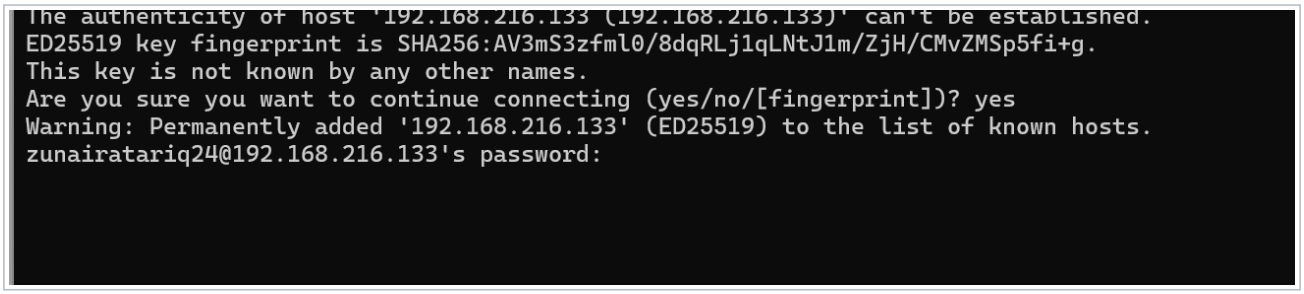

***ubuntu_ip_address.png**: Active interface ens33 with IPv4 address 192.168.216.133 shown after inet.*

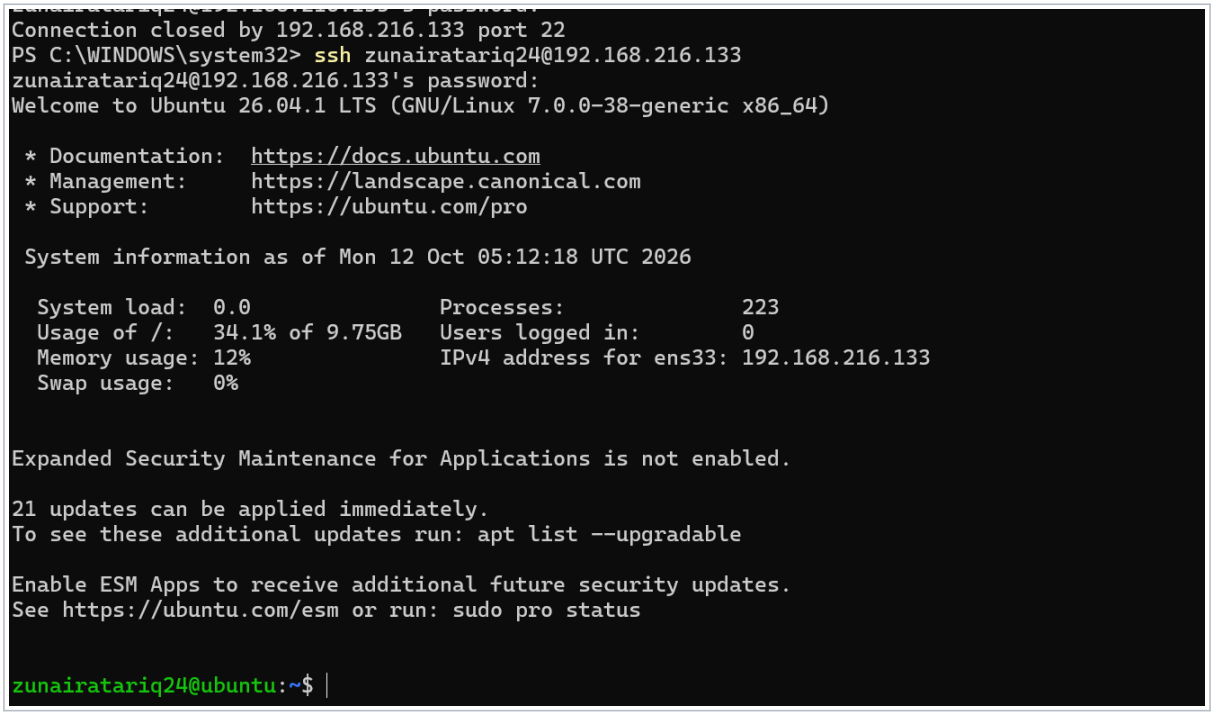

Task 17: Connect to Ubuntu Server from Windows

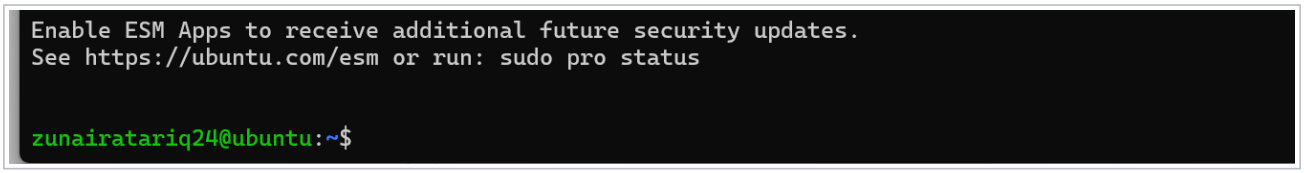

***windows_ssh_command.png**: SSH command run from Windows: ssh zunairatariq24@192.168.216.133.*

***windows_ssh_fingerprint.png**: Server fingerprint accepted by typing yes.*

***windows_ssh_login.png**: Successful SSH session after entering the password (password not displayed).*

***windows_ssh_identity.png**: Remote prompt zunairatariq24@ubuntu confirming the correct identity.*
